PRODUCT DESCRIPTION
Permatex® Silicone Ceramic Extreme Brake Parts Lubricant is an orange, non-melting, silicone-based lubricant formulated with the latest rust, oxidation, and anti-wear additives to provide long lasting protection against friction, wear, and corrosion. Silicone Ceramic Extreme Brake Parts Lubricant is fortified with a high concentration of a unique, high temperature ceramic boundary lubricant that stay in place and protect at extreme temperatures from -50°F to +3000°F (-46°C to +1649°C), while providing protection against dirt, corrosion, and uneven pad wear. This product was designed to be used on the backing plates of friction pads and all brake hardware that needs lubrication. It is compatible with internal and external brake rubber and plastic hardware, including ethylene-propylene rubber.

PRODUCT BENEFITS
- Wide temperature range
- Chemical resistant
- Prevents disc brake squealing and chattering
- Water proof; will not wash out
- Reduces wear
- Outperforms ordinary caliper greases and traditional disc brake quiet products
- Silicone based formula
- Prevents rust and corrosion
- Lasts the life of the pads and shoes

TYPICAL APPLICATIONS
- Long and short bolts
- Sleeves
- Bushings
- Outboard pad backing plate
- Inboard pad backing plate
- Disc brake calipers
- Caliper pins
- Pistons

DIRECTIONS FOR USE
1. Wire brush the caliper housing and anchor plate to remove all dirt and dust.
2. Clean all parts with Permatex® Brake & Parts Cleaners.
3. Apply Permatex® Silicone Ceramic Extreme Brake Parts Lubricant to all moving caliper hardware, mating surfaces and steel backing plates of the disc brake pads.
4. Lubricant may be applied to the Backs of brake pads to act as a noise suppressor eliminating caliper brake squeal and chatter.
5. Any excess grease that squeezes out from the mating surfaces should be removed.

Note: Keep lubricant off pads and rotors.
