Technical Data Sheet

Permatex® Aerosol Rust Treatment

INDUSTRIAL

PRODUCT DESCRIPTION

Permatex® Aerosol Rust Treatment is a fast drying, vinyl coating that sprays on clear and converts rust to a black metal-protective coating that prevents continued corrosion. The product protects the surface as a pre-primer.

PRODUCT BENEFITS

- Neutralizes rust and prevents additional rust
- Converts and primes in one operation
- Eliminates sandblasting
- Works on damp, rusty metal

TYPICAL APPLICATIONS

- Pipes, valves and fittings
- Truck trailer, storage tanks
- Fences, guardrails
- Agriculture and snow removal equipment
- Conveyors, ductwork, floor gratings

DIRECTIONS FOR USE

1. Provide adequate ventilation.
2. For best results, apply to clean, dry surfaces. Remove loose rust with a wire brush. Surface rust must be present.
3. Shake can well. Note: The product does not require a ball agitator. For best results, the aerosol can should be at room temperature before spraying.
4. Holding can 8 to 10 inches from the surface, press the nozzle and uniformly discharge the product to the corroded area. A black coating will appear in about 5 minutes. Uneven color indicates need for additional coats. Apply second coat within 2 minutes.
5. Allow 24 hours minimum to dry before finish paint. Certain finish paints may require an additional primer.

Note: Aerosol product (3 coats) will cover 10 to 12 square feet at 2 mil DFT.

For Cleanup

1. Turn can upside-down and spray to clear nozzle.
2. Clean hands with Permatex® brand hand cleaners.
